

**The list of substances authorized for use Given these limitations in the perfume and cosmetic products**

Reference number on the EC directive on cosmetics	(Chemical name / INN)	The common name of ingredients (CAS, EC number)	Sphere of application	Maximum allowable concentration	Other limitations and requirements	Conditions of use and warnings which information must be communicated to the consumer
1	2	3	4	5	6	7
1a	Boric acid, borates and tetraborate, with the exception of the compound N 1184, in Annex 1	Boric acid (Boric acid) (CAS No 10043-35-3 / 11113-50-1, EC N	(A) Talc	(A) 5 percent (calculated as acid)	(A) 1. Do not use for children under 3 years	(A) 1. Do not use for children under 3 years

	to this technical regulation (Boric acid, borates and tetraborates and salts)	233-39-3 / 234-343-4)	(B) means of oral hygiene	(B) 0,1 percent (calculated as acid)	2. Not used on broken or irritated skin, when the concentration of free soluble borates greater than 1.5 percent (calculated as acid)	2. Do not use on broken or irritated skin
			(C) other funds (excluding funds of funds and bath, hair curlers)	(C) 3 percent (calculated as acid)	(B) 1. Do not use for children under 3 years	(B) 1. Do not swallow 2. Do not use for children under 3 years
					(C) 1. Do not use for children under 3 years	(C) 1. Do not use for children under 3 years

					2. Do not use on broken or irritated skin if the concentration of free soluble borates more 1.5 percent (calculated as acid)	2. Do not use on broken or irritated skin
1b	Tetraborate (Tetraborates)		(A) means for baths	(A) 18 percent (based on boric acid)	Not (a) use of funds for children up to 3 years	Not (a) use for washing children under the age of 3 years (b) good wash
			(B) means for waving hair	(B) 8 percent (based on boric acid)		
2a	Thioglycolic acid and its salts (Thioglycolic acid and its salts)	Thioglycolic Acid (Thioglycolic acid) (CAS No 68-11-1, EC N 200-677-4)	(A) means for waving or straightening the hair: the general application of professional application	8 percent in the finished vehicle, pH 7 - 9.5	a) b) c) instructions for use shall contain the following provisions:	(A) contain thioglycolates

			(B) a depilatory	11 percent in the finished vehicle, pH 7 - 9.5	Avoid contact with eyes, in case of contact with eyes, rinse immediately with plenty of water and seek medical advice	follow the instructions
			(C) other hair products that are disposed of after use	5 percent in the final means pH 7 - 12.7	(A) and (c) use of gloves	Keep out of the reach of children
				2 percent in the finished tool, pH 7 - 9.5 per thio-glycolic acid,		for professional use
						(B) and (c) contain thioglycolates follow the instructions to keep out of the reach of children

2b	Thioglycolic acid esters (Thioglycolic acid esters)		means for waving or straightening the hair of general application	8 percent in the finished vehicle pH 6 - 9.5	Instructions for use must necessarily contain the following position: Avoid contact with the eyes can cause irritation to the skin in case of contact with eyes, rinse immediately with plenty of water and seek medical advice ispolzovatperchatk i	contain thioglycolates
			professional use	11 percent in the finished vehicle pH 6 - 9.5		follow the instructions
						Keep out of the reach of children
						for professional use
3	Oxalic acid, its esters and salts (Oxalic acid, its esters and alkaline salts)	Oxalic acid (Oxalic acid) (CAS No 144-62-7, EC N 205-634-3)	Tools for hair care	5 percent		for professional use

4	Ammonia (Ammonia)	Ammonia (Ammonia) (CAS No 7664-41-7/1336-216, EC N 231-635-3 / 215-647-6)		6 percent based on NH3		More than 2 percent: contains ammonia <2>
5	Sodium tozilhloramid (Tosylchloramide sodium) <*>	Chloramine-T (Chloramine-T) (CAS No 127-65-1, EC N 204-854-7)		0.2 percent		
6	Alkali metal chlorates (Clorates of alkali metals)	Sodium chlorate (Sodium chlorate) (CAS No 7775-09-9, EC N 231-887-4)	(A) Toothpaste	(A) 5 percent		
		Potassium chlorate (Sodium chlorate) (CAS No 3811-04-9, EC N 223-289-7)	(B) other means	(B) 3 percent		

7	Dichloromethane (Dichloromethane)	Dichloromethane (Dichloromethane) (CAS No 75-09-2, EC N 200-838-9)		35 percent (in mixture with 1,1,1-trichloroet hane total concentration should not exceed 35 per cent)	0.2 per cent of the maximum contaminant	
---	--------------------------------------	---	--	--	---	--

8	<p>p-phenylenediamine, and their N - substituted derivatives, and salts thereof; N - substituted derivatives of o-phenylenediamines &lt;1&gt;, except derivatives listed in Annex 1 (N 1309, 1311, 1312) (p-Phenylenediamine, its N-substituted derivatives and their salts; N-substituted derivatives of ophenylenediamines &lt;1&gt;, with the exception of those derivatives listed elsewhere in this Annex and under reference N 1309, 1311, 1312 in Annex 1)</p>	<p>p - phenylenediamine (p-phenylenediamine) (CAS No 106-50-3, EC N 203-404-7)</p>	<p>Oxidative hair dye</p>	<p>6 percent by weight of the free base</p>	<p>(A) is not generally applicable for use dyeing the eyelashes or eyebrows</p>	<p>(A) - can cause an allergic reaction, contains phenylenediamines not be used for dyeing the eyelashes or eyebrows</p>
---	---	--	---------------------------	---	---	--

					(B) professional use	(B) For professional use only contains phenylenediamines can cause an allergic reaction, a glove
9	Metilfenilendiaminy, their N-substituted derivatives and salts <1>, with the exception of the ingredients listed in Annex 1 (N 364, 1310, 1313) (Methylphenylenediamines, their N-substituted derivatives and their salts <1> with the exception of substances under reference numbers 364, 1310 and 1313 in Annex 1)	Toluene-2 ,5-diamine (Toluene-2, 5diamine) (CAS No 95-70-5, EC N 202-442-1)	oxidative hair dye	10 percent based on the free base	(A) general application do not use for dyeing eyelashes or eyebrows	(A) can cause an allergic reaction, contains phenylenediamines not be used for dyeing the eyelashes or eyebrows

					(B) professional use	(B) For professional use only contains phenylenediamines can cause an allergic reaction, a glove
10	Diaminophenol Diaminophenols <1>		oxidative hair dye	10 percent based on the free base	(A) general application do not use for dyeing eyelashes or eyebrows	(A) can cause an allergic reaction, contains phenylenediamines not be used for dyeing the eyelashes or eyebrows
					(B) professional use	(B) For professional use only contains phenylenediamines can cause an allergic reaction, a glove

11	Dichlorophen (Dichlorophen)	Dichlorophen (Dichlorophen) (CAS No 97-23-4, EC N 202-567-1)		0.5 percent		contains dichlorophen
12	Hydrogen peroxide, and other compounds or mixtures which release hydrogen peroxide, including carbamide peroxide and zinc peroxide (Hydrogen peroxide, and other compounds or mixtures that release hydrogen peroxide, including carbamide peroxide and zinc peroxide)	Hydrogen Peroxide (Hydrogen peroxide) (CAS No 7722-84-1, EC N 231-765-0)	(A) hair care	12 percent of H2O2 (40 volume fractions), present or leased		(A), (b), (c), (e) contains hydrogen peroxide to avoid contact with eyes, in case of contact with eyes, rinse immediately with
			(B) means of skin care	4 percent of H2O2 present or leased		(A) use gloves
			(C) the means to strengthen nails	2 percent H2O2 present or leased		(E) concentration of H2O2, present or release contains Percentage
			(D) Oral hygiene products, including lotions, toothpastes	<= 0.1 percent H2O2 present or leased		

			(E) means for whitening teeth	(E) > 0.1% ≤ 6% H <sub>2</sub> O <sub>2</sub> , present or leased	(E) Does not apply to persons younger than 18 years. The first application should be done after consulting a dentist or with his direct participation. After that, for the completion of the course, the means used by the consumer alone	Not suitable for persons under 18 years of age. The first application should be done after consulting a dentist or with his direct participation. After that, for the completion of the course, the means used by the consumer alone
13	Formaldehyde <2> (Formaldehyde)	Formaldehyde (Formaldehyde) (CAS No 50-00-0, EC N 200-001-8)	means for strengthening nails	5 percent based on the formaldehyde		protect the nail rollers fat or oil contains formaldehyde <3>

14	Hydroquinone (4) (Hydroquinone)	Hydroquinone (Hydroquinone) (CAS No 123-31-9, EC N 204-617-8)	(A) oxidative hair dye	0.3 percent	general application	Do not use to dye eyelashes and eyebrows in contact with the eyes, immediately rinse contains hydroquinone For professional use only contain hydroquinone in
			(B) artificial systems Nail	0.02 percent (after mixing for use)	not be used for dyeing the eyelashes or eyebrows	contact with the eyes, immediately wash out
					professional use	b) For professional use only avoid contact with the skin used in accordance with the instructions

15a	Sodium hydroxide, potassium (Potassium or sodium hydroxide)	Potassium hydroxide / sodium hydroxide (Potassium hydroxide / sodium hydroxide) (CAS No 1310-58-3 / 1310-73-2, EC N 215-181-3 /	(A) For nail cuticle softener	(A) 5 percent to <4>		(A) contains an alkali. Avoid contact with eyes. May cause
			(B) Preparations for straightening	(B) 1,2 percent <4> 4.5 percent to pH 12,7 to pH		blindness. Keep out of the reach of children
			1. General application	11		(B) 1. Contains alkali. Avoid
			2. Professional use			contact with eyes. May cause blindness. Store in
			(C) a pH regulator in depilatory			reach of children. 2. Only
(D) a pH adjuster other means		professional use. Do not get ineyes. May cause blindness. (C) Keep out of reachof children. Avoid contact with eyes				

15b	Lithium hydroxide (Lithium hydroxide)	Lithium hydroxide (Lithium hydroxide) (CAS No 1310-65-2, EC N 215-183-4)	(A) Preparations for hair straightening	(A) 1,2 percent <4> 4.5 percent <4>	b) The pH must not exceed 12.7	(A) 1. Contains alkali. Avoid contact with eyes. May cause	
			1. General application			c) pH-value should not exceed 11	blindness. Keep out of the reach of
			2. Professional use				of children. 2. For professional
			(B) a pH adjuster in Depilatories				application. Avoid contact with eyes. May cause blindness.
			c) used as a pH regulator in other media (for flushable products)				(B) contains an alkali. Keep out of the reach of children. Avoid contact with eyes
15c	Calcium hydroxide (Calcium hydroxide)	Calcium hydroxide (Calcium hydroxide) (CAS No 1305-62-0,	(A) Hair straightening preparations with the	(A) 7 percent	b) the pH value should not exceed 12.7	(A) contains an alkali.	

		EC N 215-137-3)	addition of calcium hydroxide and guanidine salts.		c) the pH value should not exceed 11	Avoid contact with eyes.
			(B) a pH adjuster in Depilatories			May cause blindness.
			c) another application			Keep out of the reach of children.
						(B) contains an alkali.
						Keep out of the reach of children.
						Avoid contact with eyes
16	1-Naphthol and its salts (1-Naphthol and its salts)	1-Naphthol (1-Naphthol) (CAS No 90-15-3, EC N 201-969-4)	oxidising coloring agent for hair coloring	2 percent	in combination with hydrogen peroxide using the maximum concentration should be 1 percent	can cause allergic reactions

17	Sodium nitrite (sodium nitrite)	Sodium nitrite (sodium nitrite) (CAS No 7632-00-0, EC N 231-555-9)	corrosion inhibitor	0.2 percent	not used in conjunction with secondary or tertiary amines or compounds capable of forming nitrosamines	
18	Nitromethane (Nitromethane)	Nitromethane Nitromethane (CAS No 75-52-5, EC N 200-876-6)	corrosion inhibitor	0.3 percent		
19	Moved or deleted (Moved or deleted)					
20	Moved or deleted (Moved or deleted)					
21	-9-ol 6'-methoxy-(8.alpha., 9R) and its salts ((Cinchonan-9-ol, 6'-methoxy-, (8.alpha., 9R)-and its salts)	Quinine (Quinine) (CAS No 130-95-0, EC N 205-003-0)	(A) shampoos	(A) 0,5 percent, based on the free base		
			(B) lotions	(B) 0,2 percent, based on the free base		

22	Resorcinol <4> (Resorcinol)	Resorcinol (Resorcinol) (CAS No 108-46-3, EC N 203-585-2)	(A) products for hair coloring	(A) 5 percent		(A) 1. Contains resorcinol.
			1. General application	(B) 0,5 percent		Rinse hair well after application.
			2. Professional application			Do not use to dye eyelashes and eyebrows.
			(B) lotions and shampoos			Rinse eyes immediately if product enters.
						2. For professional use only.
						Rinse eyes immediately if product enters.
						Avoid contact with eyes.
						(B) comprises resorcinol
23	(A) an alkali metal sulfide (Alkaline sulphides) (b) Sulfides of alkaline earth metals (Alkaline earth sulphides)		(A) a depilatory	(A) 2 percent based on the sulfur to pH 12.7		(A) Avoid contact with eyes. Keep out of the reach of children

			(B) a depilatory	(B) 6 percent sulfur based on the pH to 12.7		(B) Avoid contact with eyes. Keep out of the reach of children
24	Water-soluble zinc salts, with the exception of 4gidroksibenzolsulfonata (N 25) and zinc pyrithione (N 101 Annex 4, N 8) (Water-soluble zinc salts with the exception of zink-4-hydroxybenzenesulphonate (entry 25) and zinc pyrithione (entry 101 fnd Annex Y, entry 8)	Zinc acetate, zinc chloride, zinc gluconate, zinc glutamate (Zinc acetate, zinc chloride, zinc gluconate, zinc glutamate)		1 percent, based on zinc		

25	4 hydroxybenzenesulfonate Zinc (Zinc 4-hydroxybenzene sulphonate)	Phenolsulfonate zinc (Zink phenolsulfonate) (CAS No 127-82-2, EC N 204-867-8)	Deodorants, antiperspirants and thick (astringent) Lotions	6 percent calculated on the anhydrous substance		Avoid contact with eyes
----	---	---	---	--	--	----------------------------

26	Ammonium monofluorophosphate (Ammonium monofluorophosphate)	Ammonium monofluorophosphate (Ammonium monofluoro-phosphate) (CAS No 20859-38-5 / 66115-19-3)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted under this Annex, total F concentration must not exceed 0.15 percent		contains ammonium monofluorophosphate For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	-----------------------	--	--	--

27	Disodium fluorophosphate (Disodium fluorophosphate)	sodium monofluorophosphate (Sodium monofluorophosphate ) (CAS No 10163-15-2 / 7631-97-2, EC N 233-433-0 / 231-552-2)	oral hygiene products	0.15 percent in calculated as F, in a mixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		contains sodium monofluorophospha te For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	--------------------------	---	--	--

28	Dipotassium fluorophosphate (Dipotassium fluorophosphate)	Potassium monofluoro-phosphate (Potassium monofluorophosphate ) (CAS No 14104-28-0, EC N 237-957-0)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		contains potassium monofluorophosphate For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	--------------------------	---	--	---

29	Monofluorophosphate calcium (Calcium monofluorophosphate)	Monofluorophosphate , calcium phosphate (Calcium monofluorophosphate ) (CAS No 7789-74-4, EC N 232-187-1)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises calcium monofluorophospha te For all toothpastes containing fluoride concentration of 0.1 - 0.15 per cent, to be given information about the mass fraction For fluoride toothpaste designed for children up to 6 years should be given guidance on the application
----	--	--	--------------------------	---	--	--

30	Calcium fluoride (Calcium fluoride)	Calcium fluoride (Calcium fluoride) (CAS No 7789-75-5, EC N 232-188-7)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises calcium fluoride All toothpastes containing fluoride concentration of 0.1 - 0.15 per cent, should provide information on the mass fraction For fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	-------------------------------------	---	--------------------------	---	--	--

31	Sodium fluoride (Sodium fluoride)	Sodium fluoride (Sodium fluoride) (CAS No 7681-49-4, EC N 231-667-8)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises sodium fluoride for all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass fraction For fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	-----------------------------------	---	--------------------------	---	--	---

32	Potassium fluoride (Potassium fluoride)	Potassium fluoride (Potassium fluoride) (CAS No 7789-23-3, EC N 232-151-5)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises potassium fluoride for all toothpastes containing fluoride concentration of 0.1 - 0.15 per cent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	---	--	-----------------------	---	--	--

33	Ammonium fluoride (Ammonium fluoride)	Ammonium fluoride (Ammonium fluoride) (CAS No 12125-01-8, EC N 235-185-9)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises ammonium fluoride for all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	---------------------------------------	---	-----------------------	---	--	--

34	Aluminum fluoride (aluminium fluoride)	Aluminum fluoride (aluminium fluoride) (CAS No 7784-18-1, EC N 232-051-1)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total concentration of F must not exceed 0.15 percent		contains aluminum fluoride for all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	---	-----------------------	--	--	---

35	diftoristoe tin (Tindifluoride)	Tin fluoride (Stannous fluoride) (CAS No 7783-47-3, EC N 231-999-3)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in This application, F total concentration should not exceed 0.15 percent		Tin contains fluoride for all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass fraction of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	---------------------------------	---	-----------------------	---	--	---

36	Hexadecylammonio fluoride (Hexadecyl ammonium fluoride)	Cetylamine hydrogen fluoride (cetylamine hydrofluoride) (CAS No 3151-59-5, EC N 221-588-7)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds allowed in this application, the total F concentration must not exceed 0.15 percent		hexadecylammonio contains fluoride for all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	-----------------------	---	--	---

37	<p>Dihydrofluoride 3 - (Ngeksadetsil-N-2-hydroxyethylammonium) propylbis-(2-hydroxyethyl) ammonium chloride (3 - (N-Hexadecyl-N-2-hydroxyethyl-ammonio) propylbis (2-hydroxyethyl) ammonium dihydrofluoride</p>		oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		<p>dihydrofluoride comprises 3 - (Ngeksadetsil-N-2) hydroxyethylammonium) propylbis (2gidroksietil) ammonium All toothpastes containing fluoride concentration of 0.1 - 0.15 per cent, to be given information about the mass fraction of fluoride toothpaste intended Children under 6 years of age should be given guidance on the application</p>
----	---	--	-----------------------	---	--	--

38	<p>Dihydrofluoride N, N', N'-tris (polyoxyethylene)-N-geksadetsilpropilen diamine (N, N', N'-Tris (polyoxyethylene)-N-hexadecylpropylenediamine dihydrofluoride)</p>		<p>oral hygiene products</p>	<p>0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent</p>		<p>dihydrofluoride comprises N, N', N'-tris (polyoxyethylene) N-geksadetsilpropilendiamina All the toothpastes containing fluoride concentration 0.1 - 0.15 per cent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application</p>
----	--	--	------------------------------	--	--	---

39	9 Oktadetsenamin hydrofluoride (9-Octadecenamine, hydrofluoride)	Oktadetsenilammony fluoride (Octadecenylammonium fluoride) (CAS No 2782-81-2)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total concentration should not exceed F 0.15 percent		octadecenyl contains ammonium fluoride For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	---	-----------------------	---	--	---

40	Disodium neksaftorsilikat (Disodium hexafluorosilikate)	Sodium fluorosilikate (Sodium fluorosilikate) (CAS No 16893-85-9, EC N 240-934-8)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted under this Annex, total F concentration must not exceed 0.15 percent		contains sodium fluorosilikate For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	---	--------------------------	---	--	---

41	Dipotassium hexafluorosilicate (Dipotassium hexafluorosilicate)	Potassium fluorosilicate (Potassium fluorosilicate) (CAS No 16871-90-2, EC N 240-896-2)	oral hygiene products	0.15 percent in calculated as F, in mixed with other fluorine compounds permitted under this Annex, total F concentration must not exceed 0.15 percent		contains sodium fluorosilicate For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	--------------------------	---	--	---

42	Ammonium fluorosilicate (Ammonium hexafluorosilicate)	Ammonium fluorosilicate (Ammonium fluorosilicate) (CAS No 16919-19-0, EC N 240-968-3)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		contains ammonium fluorosilicate For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	--	--------------------------	---	--	---

43	Hexafluorosilicate Magnesium (Magnesium hexafluorosilicate)	Fluorosilicate magnesium (Magnesium fluorosilicate) (CAS No 16949-65-8, EC N 241-022-2)	oral hygiene products	0.15 percent based on F, in admixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		comprises magnesium fluorosilicate For all toothpastes containing fluoride concentration of 0.1 - 0.15 per cent, to be given information about the mass fraction For fluoride toothpaste designed for children up to 6 years should be given guidance on the application
----	--	--	--------------------------	---	--	--

44	1,3-bis (hydroxymethyl) imidazolidin-2-thione (1,3-Bis (hydroxymethyl)-imidazolidine-2-thione)	Dimethylol ethylene thiourea (Dimethylol ethylene thiourea) (CAS No 15534-95-9, EC N 239-579-1)	(A) means for hair care	(A) to 2 percent	(A) may not be used in aerosols	(A) (b) comprises 1,3-bis (hydroxymethyl) imidazolidin-2-thione
			(B) means for nail care	(B) up to 2 percent	(B) At pH <4 product	
45	Benzyl alcohol <7> (Benzyl alcohol)	Benzyl alcohol (Benzyl alcohol) (CAS No 100-51-6, EC N 202-859-9)	solvents, perfumes and fragrances		for other purposes and not to suppress the growth of microorganisms. The appointment must be specified in the product	
46	6-methylcoumarin (6-methylcoumarin)	6-methylcoumarin (6-methylcoumarin) (CAS No 92-48-8, EC N 202-158-8)	oral hygiene products	0.003 percent		

47	Nikometanola hydrogen fluoride (3-Pyridinemethanol, hydrofluoride)	Nikometanola hydrogen fluoride (Nicomethanol hydrofluoride) (CAS No 62756-44-9)	oral hygiene products mouth	0.15 percent in based on fluorine in a mixture with other fluorine compounds permitted in this application, the total F concentration must not exceed 0.15 percent		contains hydrogen fluoride nikometanola For all toothpastes containing fluoride at 0.1 - 0.15 percent, should provide information on the mass concentration of fluoride toothpaste designed for children up to 6 years old should be given guidance on the application
----	--	---	-----------------------------	--	--	--

48	Silver nitrate (Silver nitrate)	Silver nitrate (Silver nitrate) (CAS No 7761-88-8, EC N 231-853-9)	exclusively for the coloring of eyebrows and eyelashes	4 percent		comprises silver nitrate. In case of contact with eyes, rinse immediately with
49	Selenium disulphide (Selenium dsulphide)	Selenium disulphide (Selenium dsulphide) (CAS No 7488-56-4, EC N 231-303-8)	Anti-dandruff shampoos	1 percent		contains selenium disulfide. Avoid contact with eyes or damaged skin
50	Integrated aluminum-zirconium salt of (complex with glycine) $Al_xZr(OH)_yCl_z$ (Aluminium zirconium chloridehydroxide complexes $Al_xZr(OH)_yCl_z$ and the aluminium zirconium chloridehydroxide glycine complexes)		Antiperspirants	20 percent based on the anhydrous aluminum zirconium	1. The ratio of the number of Al atoms to the number of atoms of Zr should be in the range of 2 - 10.	does not apply to damaged and irritated skin
